
TEACHING EVALUATIONS

Experimental Control Systems

Course code: T350043401

Shouvik Chaudhuri

Spring 2023 - Spring 2025

Contents

Spring 2023 (F23)	Pages 2-7
Spring 2024 (F24)	Pages 8-11
Spring 2025 (F25)	Pages 12-16

Original evaluation reports presented in chronological order.

Experimental Control Systems (T350043401)

Academic Study Board of the Faculty of Engineering

Course responsible: Christina Skytte Møller, Jakob Kjelstrup-Hansen

Teachers: Shouvik Chaudhuri

Semester: *Spring 2023*

A total of **27** questionnaires was sent.

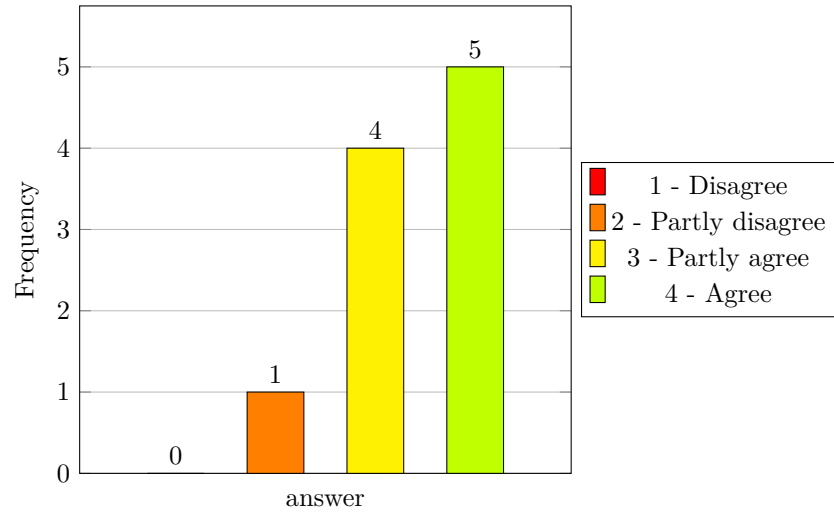

A total of **10** responses was received.

Questions

I am satisfied with my own efforts in the subject (including teaching, preparation, project work, group work, etc.)

Mean	Variance	Standard deviation
3.40	0.49	0.70

I have benefitted academically by the teaching by Teacher

Name	Mean	Variance	Standard deviation	Not relevant/Dont know
Shouvik Chaudhuri	3.60	0.49	0.70	0

What can be improved and what has worked well?**Shouvik Chaudhuri***No comments by students***What has worked well and what can be improved?****Shouvik Chaudhuri***No comments by students***Do you have more things to say?****Shouvik Chaudhuri**

- I would like to express my gratitude to everyone at SDU who contributed to designing this course. It aligns perfectly with my academic focus, allowing me to apply the theory I learned in the control course from the first semester to the five projects in this course. However, I have a minor concern that the experiments may be time-consuming. In my opinion, four experiments would be sufficient for the 5 ECTS.
- It was an excellent course, we learned a lot about control theory, also the teacher Shouvik was always available for questions and discussions regarding the experiments

- I like the course, but I feel it takes more time to finish, than a 5ECTS course should take.
- thank you in all everything was clear i really liked what you have done , just one point i would like to mention that the number of experiments was not in parallel with the ECTS of the course. thank you so much for you assistance along the course! perfect !

What has worked well and what can be improved?

Shouvik Chaudhuri

- I don't see anything bad with Shoubik lectures, just the clarity of the experiment description seems that they arent good enough and also the amount of work for it is a lot for Exp 2 and Exp 1. The tuning part doesnt make any sense and Matias's solutions are very advanced that it would take more time to understand what he did and how than trying to make it work somehow with our solution.

Do you have more things to say?

Shouvik Chaudhuri

- Shouvik is a good teacher. Matias also helped us a lot at the start of the semester, he was a great guide and a good fella.
- I would say this is the best course this semester, not only we're finally doing practical work, we're also applying what we learned last semester to do it, which is good because we can see how we can apply what we learn to a real-life situation, even though it's applied to some experimental equipments. Shouvik and Matias also helped us with the experiments a lot and they also gave us tips and tricks with the experiments and report. Thank you Shouvik and Matias :)
- Love it
- Before the semester starts check that every experimental device is working properly
